

# Little Wandle SEND programme: Tricky words

## Information for parents and carers

'Tricky words' are words that cannot easily be decoded ('sounded out' and read). This is because some of the sounds in the words are spelled in an unusual way. We teach these words early on as they are among the most common words in English. Children will practise the words in school until they can read them automatically. They will also read the tricky words in the decodable books that they bring home.

This document lists the tricky words that your child will learn in each phase of their Little Wandle reading programme and explains why the words are tricky.

Some of the tricky words will become decodable later in the programme as children learn different spellings for the sounds. The words in shaded rows have rare spellings and remain 'tricky' throughout.

### Terminology

**Phoneme:** The smallest unit of sound that can be identified in words. We also use the term 'sound'. There are 44 phonemes or sounds in the English language.

**Grapheme:** A letter or group of letters used to represent a sound in writing. The way graphemes are used to represent sounds in our written language is known as the alphabetic code.

**Decode:** To break down ('sound out') a written word into sounds then blend the sounds together to read the word.

**Digraph:** A grapheme made of two letters that represent one sound. An example is the 'sh' in 'shop'. Your child may use the mantra 'two letters, one sound' when they spot a digraph.

**Schwa:** This is the name for the most common sound in English. It is the unstressed sound that we find in many words and can be spelled in many ways. It makes an 'uh' sound, which varies according to accent. Examples include: the, better, carrot, balloon.

**Split digraph:** A vowel digraph that is split by a consonant. Examples include 'a-e' as in 'cake' (**ai** sound); 'e-e' as in 'athlete' (**ee** sound), 'i-e' as in 'time' (**igh** sound), 'o-e' as in 'bone' (**oa** sound) and 'u-e' as in 'tube' (**yoo** sound).

**Trigraph:** A grapheme made of three letters to represent one sound. An example is the 'igh' in 'sight'. Your child may use the mantra 'three letters, one sound' when they spot a trigraph.
